Tags: [sword](#) [collapsing](#) [katana](#)

This is a collapsing Katana sword designed to be printed as one part. Its only 182mm high when printed but expands to over 825mm in total length!

The [Replaceable Single Edged Curved Blade Version](#) is available to my Clubs members.

Supports are not required, for best results use a .4mm nozzle. Find detailed instructions on how to print collapsing swords on my [website](#). If this is your first time printing, I would suggest you try the [test print](#) first.

Here's a link to the [gold](#) (aff) filament I used to make the sword.
