Elegant and satisfying fidget toy.

Compatible with [Spiral Balls](#) and [Parametric Spiral Cone](#) with default parameters.

Outer part (SpiralHourglass.stl) may be challenging to print, so I added the SpiralHourglassSupported.stl file. It has 3 layers of bridges between columns. Remove those bridges with cutters or knife before use.

No supports needed.

You can support me and get Commercial Licence to sell physical prints on [Patreon](#) and [Boosty](#)!
